PMC ENGINEERING IS EXHIBITING AT PRI 2021 Join Us at Booth # 4046

We are thrilled to be meeting face-to-face again! As always, our experts at PMC Engineering are eager to help you solve your application challenges. Stop by **Booth #4046**, in our normal location, to view our range of sensors and pressure scanners designed to meet your specific needs.

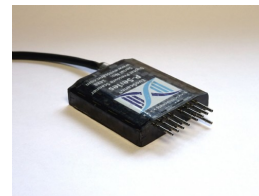

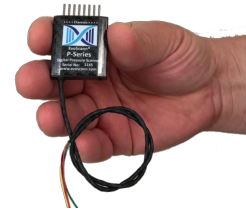

At PMC, we are proud to be a US-based manufacturer and supplier since 1963. We look forward to seeing you at PRI December 9-11!

FEATURED PRODUCTS

P-Series Pressure Scanners

The P-Series is a highly miniaturized pressure scanner designed specifically to meet the stringent demands of the aerodynamic testing industry where development is rapid and continuous. Utilizing the latest in miniature scanner technology, the P-Series is at the forefront of pressure measurement in challenging aerodynamic locations.

The P-8 and P-16 miniature pressure scanners are designed with physical size, weight, accuracy and functionality in mind and is available in a variety of configurations for eight pressure channels.

High Precision Pressure Transmitters

PMC offers a comprehensive range of precision pressure transducers and transmitters, with full scale ranges from 0-1, through 0-15,000 psi, accuracies of 0.05%, and operating temperature ranges from -320°F up to 300°F.

We cover most high-performance applications in areas such as Motorsport, Engine Test, Satellite Launch Vehicles Flight Test, Drone/UAV/AUV/ROV, Aero, and Cryogenic.

Miniature Sensors - Introducing the ML1000

PMC Engineering introduces the **MeasureLine Series of Miniature and Sub-Miniature Precision Pressure Sensors**. These sensors are ideal for measuring pressures for fuel, water, brakes, coolant, gearbox, Dyno, Air Box, MAP, and more...
